Passionate Software Engineer driven by curiosity and a love for creating solutions, eager to contribute to a collaborative development team.

SKILLS & EXPERTISE

Javascript | HTML + CSS/Sass | Tailwind | React.js | Next.js | JQuery | MongoDB | Express | PHP | MySQL | Github | Python | Django
Photoshop | Illustrator | InDesign | Premiere | After Effects | Dreamweaver | Animate | Maya | Excel | Mac | Windows | Linux

SOFTWARE DEVELOPMENT EXPERIENCE

Decops | Software Engineer   Jul 2023 - Current
- Worked in collab with 30+ member team incl. project managers/lead developers building a web application for user-based AI workflow
- Part of UI/UX team. Took on UI related tasks for improving User Experience including dialog/modals and user saved changes to forms
- Implement existing code and UI elements from one page to others for consistency. Created Figma designs for improving UX
- Used Linear for picking up tasks and updating status. Used Github for effective code sharing and version control
- Attended regular stand ups 3x week to ensure project workflow and effective communication.
- Technologies used: Next, Radix Library, Typescript, Tailwind CSS, Figma, Linear, Github

Southeast Connecticut Eyecare | Full-Stack Software Engineer (Contract)   Sept 2022 - Feb 2023
- Created a calendar web-app for entering and tracking events | Frontend: React, JSX, Sass. | Backend: Express, Mongodb
- Initialized a start-up, web-based ecosystem for multiple eyecare practices. | Using LAMP environment: Php, MySql
- Researched and learned new technologies, implemented a user login/management system in order to register users (sitelok)
- Attended daily stand ups with stakeholders to provide regular updates and update project plans based upon changing needs.
- Led additional technology projects in the office, including support for computers and internal software.

General Assembly | Software Engineering Fellow   Aug 2021– Dec 2021
App Name: Marvel Character Comparator | Purpose: Pull and Compare Marvel Character Stats
- Front-End app comparing information from json data from a public API. Desktop and mobile responsiveness using TailwindCSS.
- User can input a name into the search field to get desired character info. Includes user-friendly UX design to assist with search process.
- Technologies used: React, TailwindCSS, Javascript, API | Deployment: Vercel

App Name: Body Movement | Purpose: App to create a workout routine
- Full CRUD(Create, Read, Update, Delete) application using MVC architecture (Models, Views, Controllers). Add data into database.
- User can create a new routine and add sets, reps, etc. Buttons for quick adding or removing of sets. Dotenv file to protect sensitive data.
- Technologies Used: Express, Ejs, Mongodb, dotenv, HTML, CSS, Bootstrap, Javascript | Deployment: Vercel

App Name: Contrivia | Purpose: Create trivia questions and answers
- Full-Stack app using Full CRUD operations. Create and connect a frontend and backend. Connect the backend to a database.
- User can create trivia questions and answers and rate their difficulty. Create, Read, Update, Delete any of the questions.
- Technologies used: Backend: Express, Mongodb, Ejs, .env | Frontend: React, JSX, Sass | Deployment: Netlify

ADDITIONAL PROFESSIONAL EXPERIENCE

Abrohn Creative | Graphic Designer   2010 – 2020
- Created app UI designs of landing pages, login pages, dashboards, payment pages, logos, posters website revisions and maintenance
- Worked on photography and photo editing, videography and video editing, created high-res digital illustrations for clients
- Coordinated with client's marketing team to ensure appropriate visual language to their written language
- Technologies user: Adobe Photoshop, Illustrator, InDesign, Premiere, After Effects, Animate, Procreate on iPad, Audodesk Maya

Allstate Insurance Company | IT Technician   2010 – 2015
- Onsite IT Technician–Fixed, serviced, replaced office computers.
- Set up and maintained office networking systems. Installed in-wall cabling, switches, bridges. Serviced any networking related issues.
- Addressed software related issues including troubleshooting bugs, crashes, operating systems, corrupted files, and data recovery.
- Serviced printers, monitors, and other hardware.

Therapy Technician | Adventist HealthCare Rehabilitation | Inpatient   Jan 2018 – Jan 2021
- Collaborated with physical therapists to implement and modify treatment plans for patients based on individual needs and progress.
- Performed scheduling of therapists to patients for a 42-bed floor and coordinated meetings between patients and physicians.

EDUCATION

- **Software Engineering Immersive Bootcamp** | General Assembly | Remote   Aug 2021 – Dec 2021
- **Pre-med** | Montgomery College | Rockville, Maryland   Aug 2015 – Dec 2018
- **3D Digital Animation** | Centennial College | New Delhi, India   Jan 2008 —Dec 2008
- **BA – Graphic Design** | Avondale University | NSW, Aus   Aug 2004 — Dec 2007
- **Certified Nursing Assistant, Basic Life Support |** Maryland   Aug 2017 — Oct 2017
